

Feature Impact on Global Happiness Scores

Ross Brinkerhoff
Capstone II | May 2024

“The *World Happiness Report* reflects a worldwide demand for more attention to happiness and well-being as criteria for government policy.”

—WHR website

Raw Data from WHR

- Data for country and year, ranging from 2005 to 2022
- 165 of 195 countries
- 10 global regions
- 2,199 Rows
- 13 features including the target

Data Features

- Country Name
- Region
- Year
- Log GDP
- Healthy Life Expectancy
- Social Support
- Freedom to make life choices
- Generosity
- Perceptions of corruption
- Positive Affect
- Negative Affect
- Confidence in National Government

Target Variable

- Life Ladder Score 0-10

Why feature impact?

- Governments / stakeholders always have limited attention and resources
- Which features have the most impact and can serve as a focus for action?

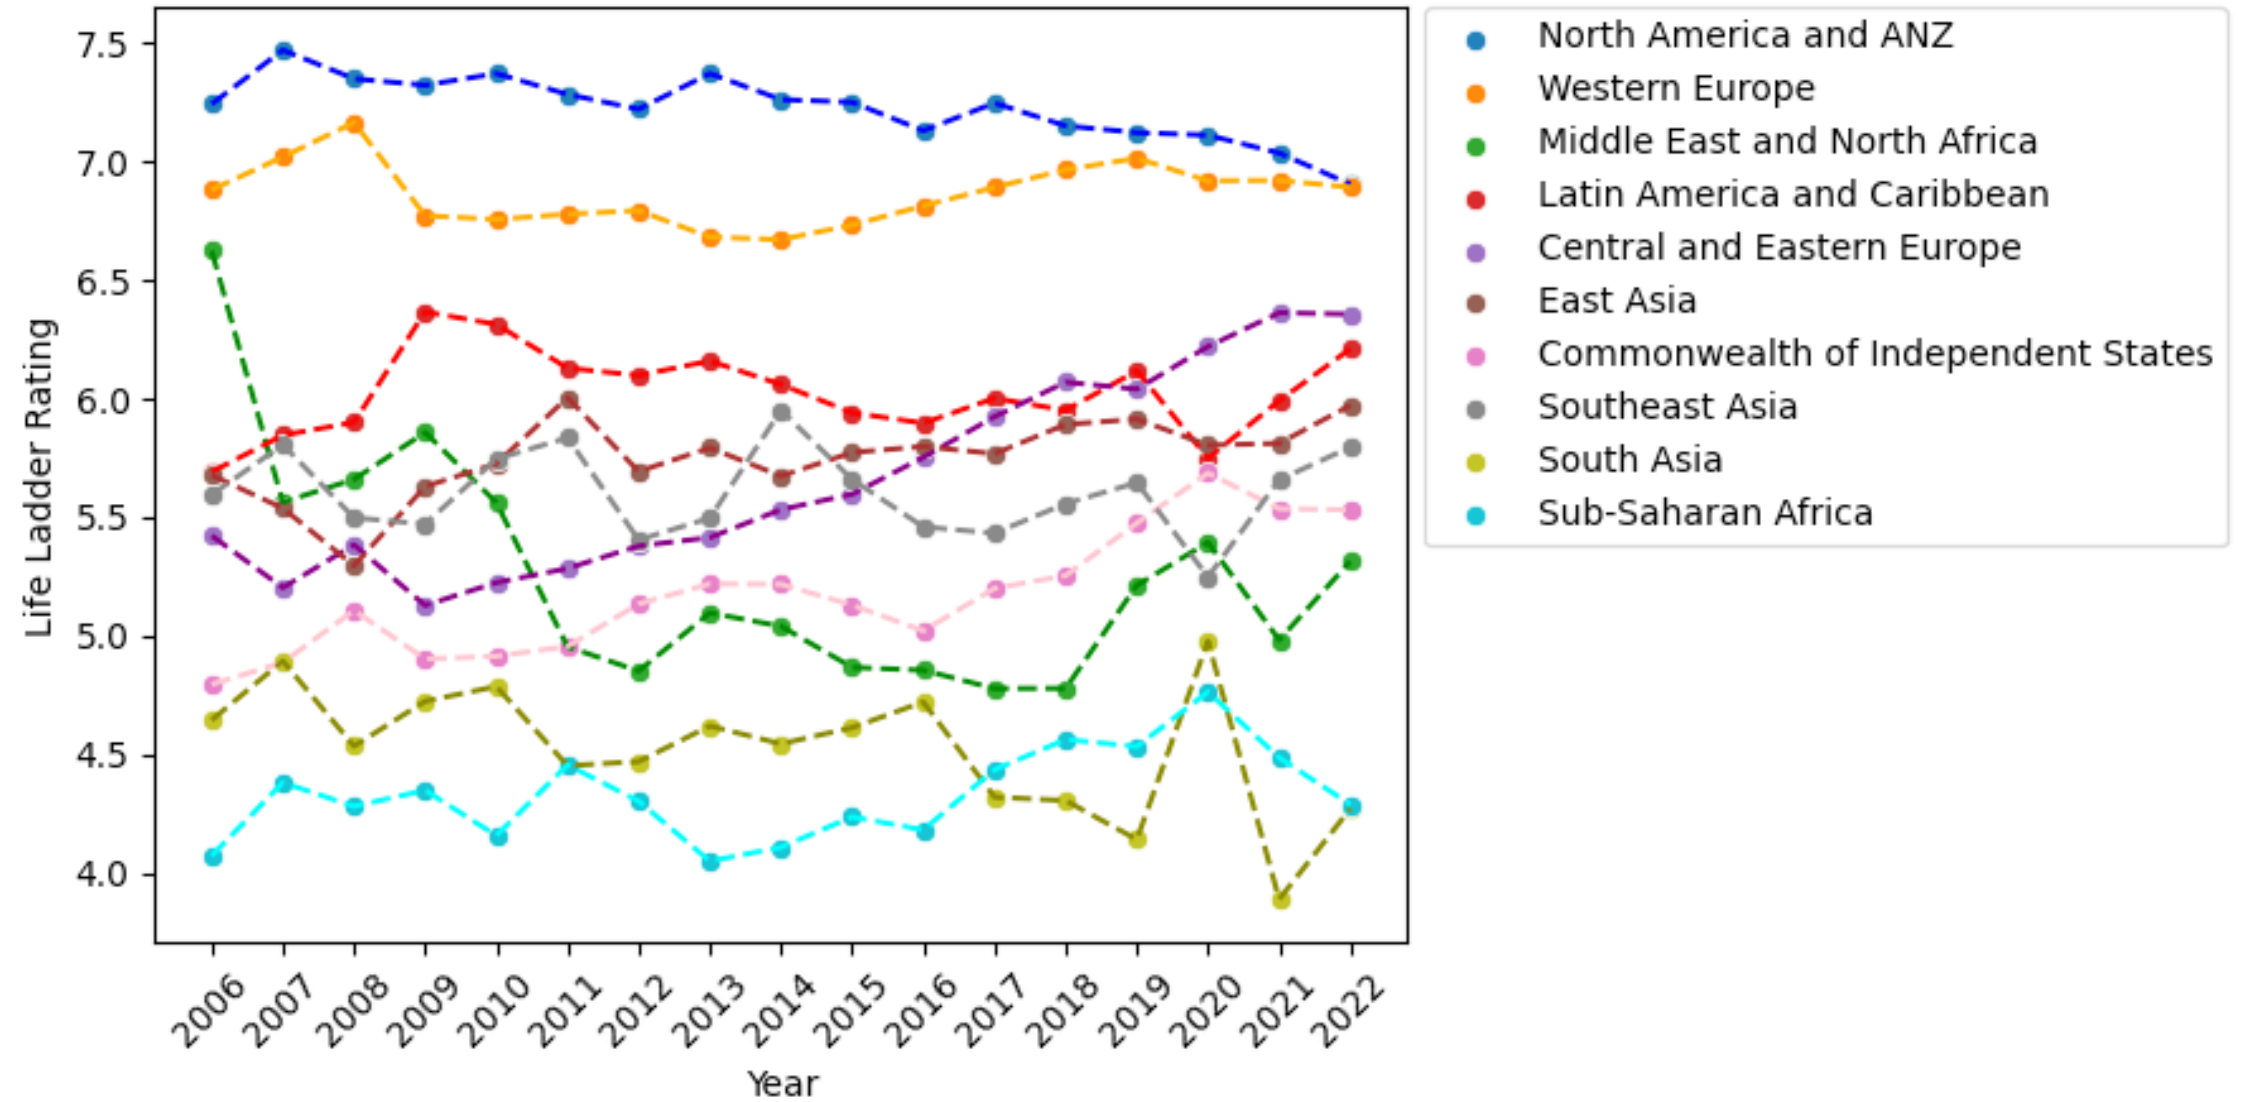

Data Wrangling – Missing Survey Data

Country	Year	Life Ladder	Perceptions of Corruption	Confidence in Government
China	2006	4.560495	NaN	NaN
China	2007	4.862862	NaN	NaN
China	2008	4.846295	NaN	NaN
China	2009	4.454361	NaN	NaN
China	2010	4.652737	NaN	NaN

Countries in Data vs. Total Countries

Change in Regional Life Ladder Score 2006-2022

Feature Correlation

Feature	Correlation with Target
Log GDP Per Capita	0.8
Social Support	0.72
Healthy Life Expectancy	0.74
Freedom to Make Life choices	0.57
Positive Affect	0.52

Regional Representation vs. World Representation

Avg. Log GDP per country across all years

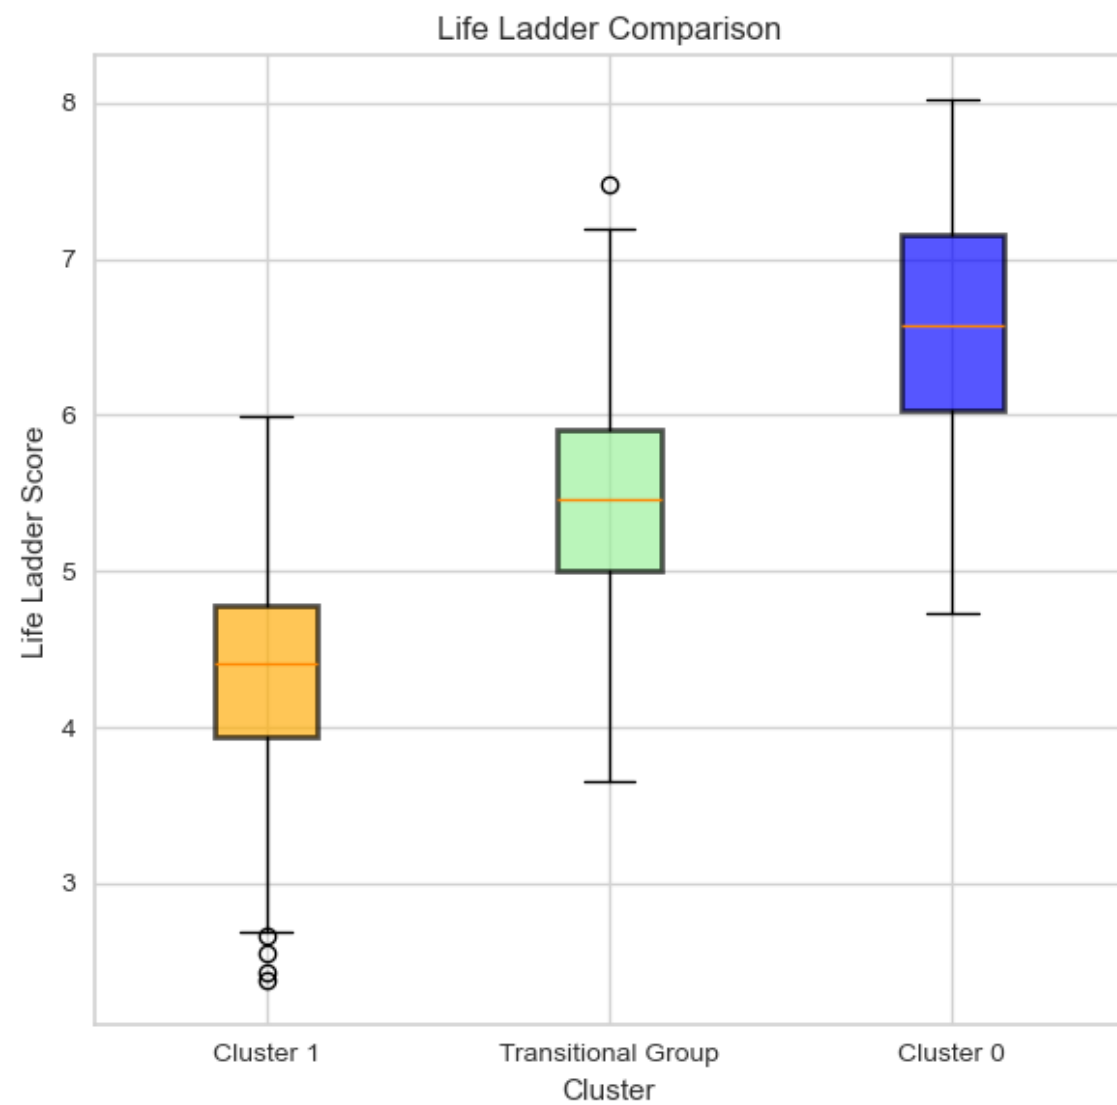

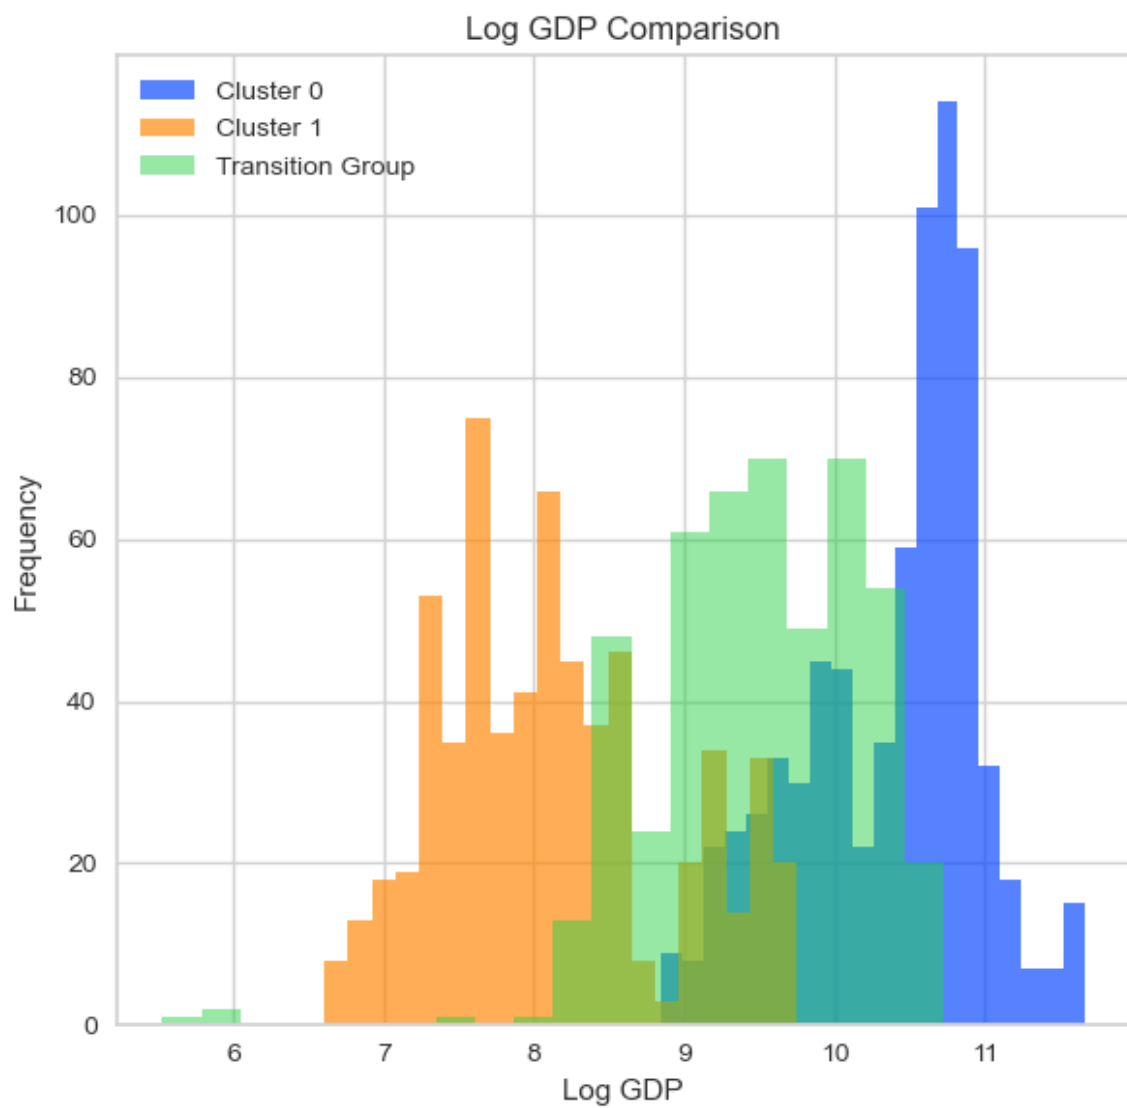

Cluster Analysis with K-Means

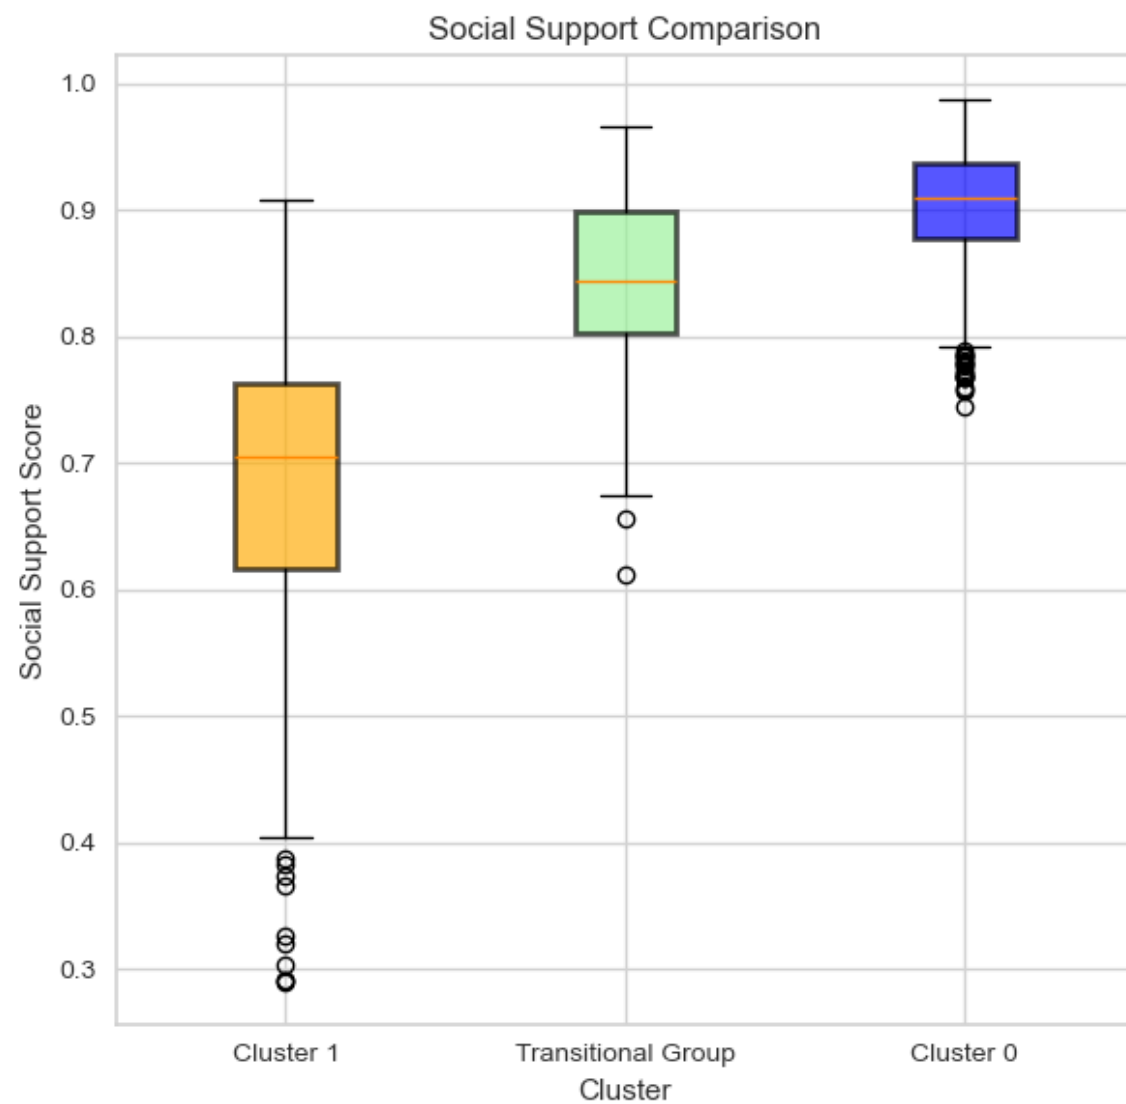

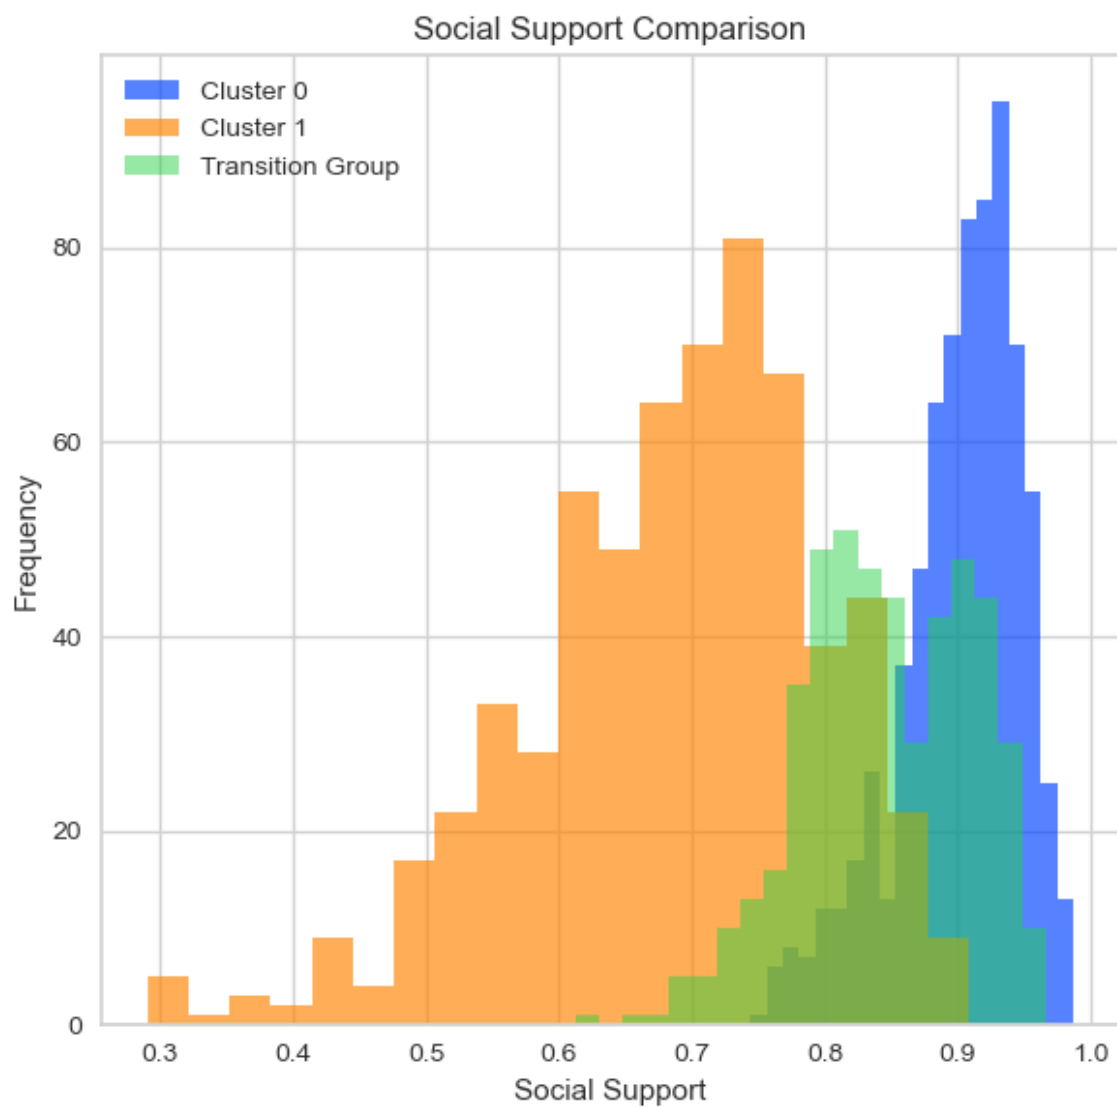

Feature	Cluster 0 Mean	Cluster 1 Mean
Life Ladder	6.4	4.5
Log GDP Per Capita	10.2	8.5
Social Support	0.89	0.72
Healthy Life Expectancy	68.4	57.7
Freedom to Make Life Choices	0.82	0.67
Generosity	0.03	-0.02
Perceptions of Corruption	0.69	0.81
Positive Affect	0.7	0.6
Negative Affect	0.24	0.3
Confidence in National Government	0.46	0.5

Predictive Modeling

Model	r2	MAE	MAPE	Improvement over Baseline
RF Regression	0.8978	0.2828	0.056	0.78%
XGBoost	0.9103	0.2675	0.0526	7.91%
LGBM	0.9107	0.2701	0.0533	3.67%

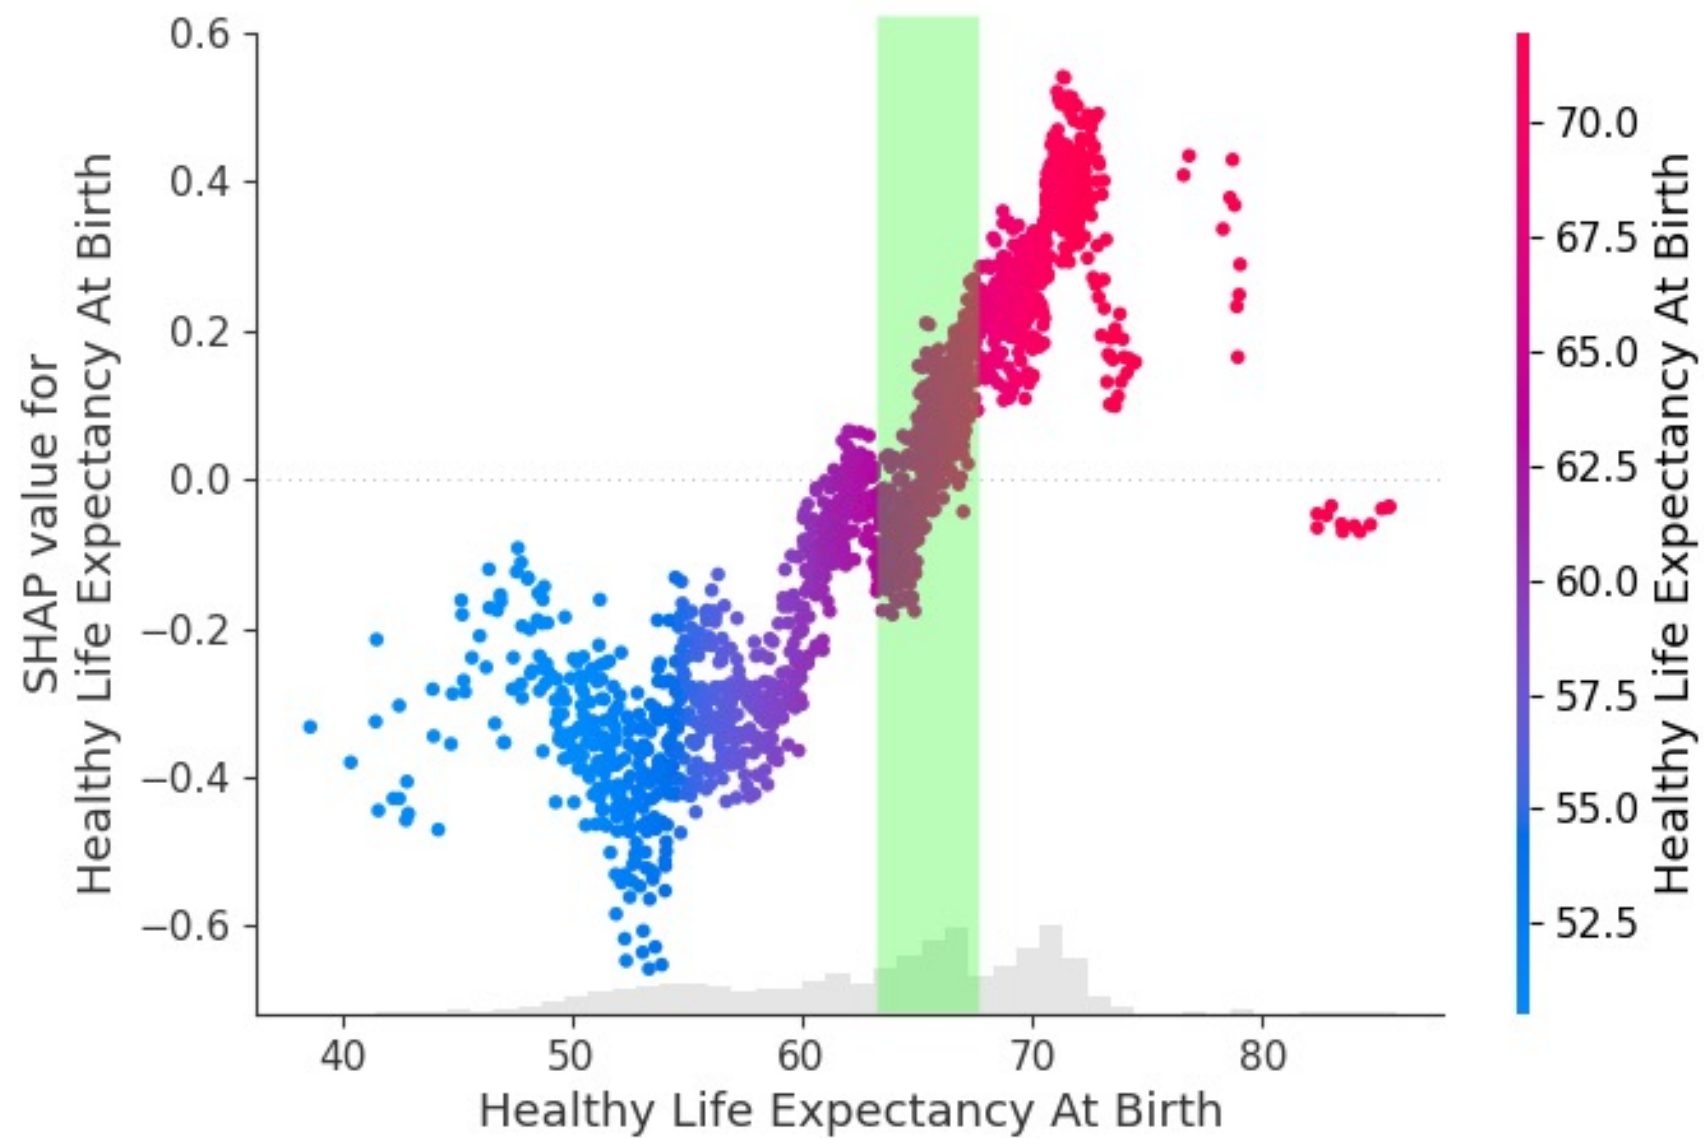

Feature Importances - XGBoost Model

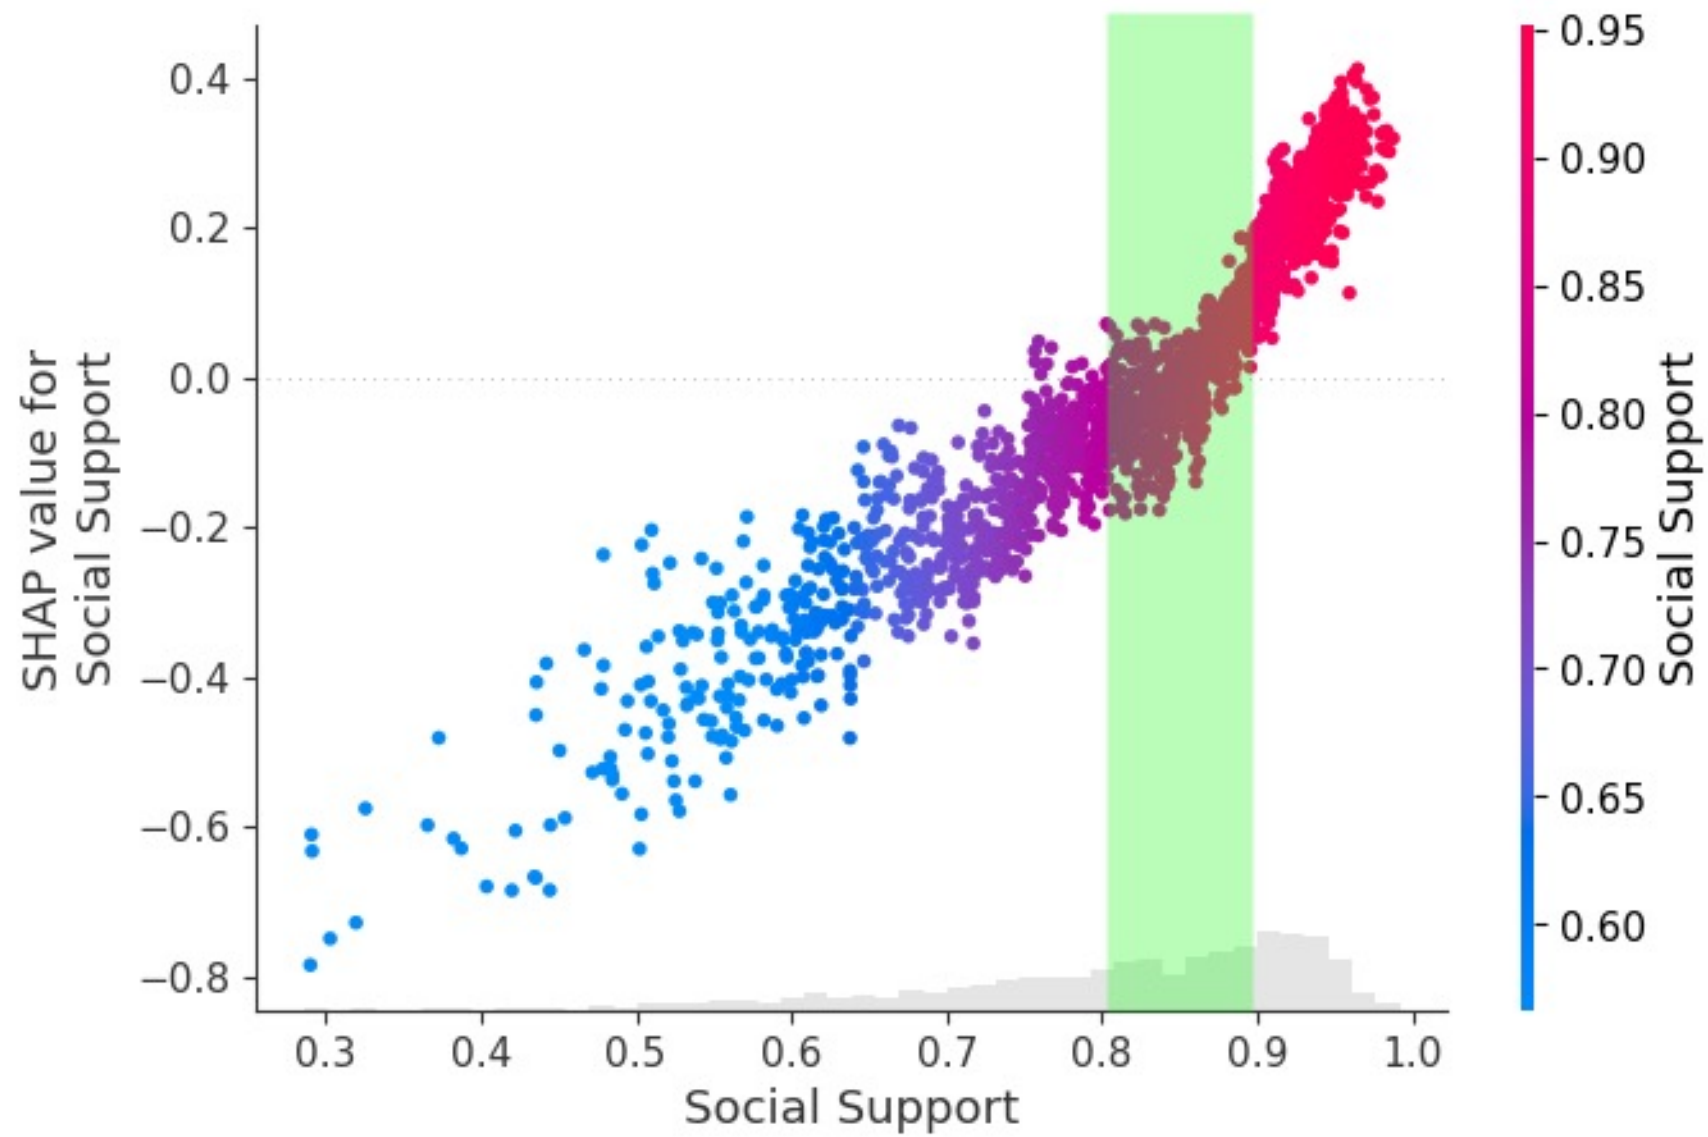

Major Feature Target Zones

Feature	General Measurement	Approximate Threshold
LOG GDP	Economic Strength	9.8
Healthy Life Expectancy	Life Span	67 years
Social Support	Strength of Personal Social Networks	0.9
Positive Affect	Previous days enjoyment	0.7

Recommendation 1:

Deeper analysis of the most impactful features using new and actionable metrics.

Recommendation 2:

Regional analysis

- Are the regional differences real?

Country level analysis

- Policy is made at the country level

Recommendation 3:

Develop proxy metrics for missing survey responses:

- Perceptions of corruption
- Confidence in government
